The aim of this digital event remains the same as on its previous in-person format, namely **to be a high-quality scientific conference and at the same time a major European dissemination event**. During our online event, virtual rooms will be available for every session, hosted by the session chair, with speakers and participants and also room for discussions, just like in a physical conference.

THE SOLUTION

- ✓ LIFESIZE platform
- ✓ 7 Virtual Meeting Rooms
- ✓ 8 Qualified Technicians
- ✓ 12 Notebooks
- ✓ 400M internet speed
- ✓ 4G Backup Router
- ✓ Online Call Center
- ✓ Monitoring Tools
- ✓ Recording Channel for each VMR

Ten days before the event all meeting rooms were created and available online so all presenters and participants could login to test the platform and get familiar with the various tools.

Three days before the event a rehearsal call took place for technical questions.

The day before the event our team met up and prepared all the equipment needed. Seven Notebooks for the In-Meeting Moderators. Three more notebooks as backups, two more notebooks for monitoring the connections and reporting.

During the event our In-Meeting Moderators started the VMRs and a conference banner was welcoming the participants as they were entering the meeting rooms. The In-Meeting moderators were responsible to keep the microphones of the participants muted, initiate the recordings, assist the chairman/speakers / guests in case it was needed allowing the chairman to concentrate in his/her own responsibilities.

At the end of each day all recording links and statistics were sent to the EASN office.
